Abstract / Description

MAMI Manual v1.0 presents the source manual for the diagnostic practical theory of Structural Exposure within MAMI Theory, defined as Meta-Architecture of Mind and Invisibility.

The Manual introduces Structural Exposure as a governance visibility problem: a condition in which persistent misalignment between formal system design and actual operation remains invisible or insufficiently visible within ordinary governance, compliance, performance-monitoring, or institutional review structures, while cumulative absorption effort by human actors sustains system functioning.

The framework is diagnostic and descriptive. It provides bounded methods for identifying and describing structural misalignment, hidden structural loss, cumulative absorption effort, governance-level visibility gaps, divergence between prescribed procedures and real-world operation, and recurring patterns that remain below ordinary escalation thresholds.

This version is prepared as a Draft for Publication Readiness Review. It has undergone internal conceptual consolidation, terminology review, boundary review, and structural consistency review. It has not undergone formal peer review or empirical validation. Systematic literature comparison and

comparative evaluation using independent real-world cases remain pending.

The Manual should not be described as peer reviewed, empirically validated, institutionally approved, professionally endorsed, operationally established, or validated for predictive, legal, clinical, regulatory, compliance, disciplinary, or institutional decision-making use.

Keywords

MAMI Theory; Structural Exposure; Invisible Structural Loss; governance visibility; diagnostic framework; bounded review; institutional review; structural misalignment; absorption effort; visibility compression; non-intervention framework; descriptive diagnostic theory; governance theory; organizational systems; evidence traceability

This document is made available for citation, review, and publication-readiness discussion as MAMI Manual v1.0 — Draft for Publication Readiness Review.

No permission is granted for unauthorized modification, redistribution of modified versions, commercial use, institutional implementation, certification, training use, derivative framework creation, or representation of adapted materials as official MAMI Theory documentation without prior written authorization from the author or an authorized distribution channel.

Short quotation, citation, and critical review may be made with clear attribution to the author, title, version number, and Draft for Publication Readiness Review status.

Any use, adaptation, quotation beyond ordinary citation, institutional discussion, commercial application, training use, or redistribution may require separate permission or licensing terms.

Review Status Note

This document is released as Version 1.0 — Draft for Publication Readiness Review. It may be cited and reviewed in that status. It should not be described as peer reviewed, empirically validated, institutionally approved, professionally endorsed, or operationally established.

Critical Conceptual Review Note

Critical conceptual review is welcome, especially regarding theoretical positioning, terminology, boundary design, relation to adjacent governance and diagnostic frameworks, evidence traceability, and suitability for future comparative case evaluation.
